[redacted]

On preparation (given that there has been given a topic or activity for a lesson)

Before: pre-planning	What's the room like? How many children? How long have I got? What's in the room that I can use? What not? Where are they coming from physically? Where are they coming from mentally? What are my expectations of them? What time of the day is it going to be? What have they done before? Records available? Where will I be coming from? physically? mentally? What are the constraints in the environment?
Beginning	How does what I'm about to do link with them? Where do I want them to be when they leave? Minimum expectations? extensions? How am I going to do this?
Mulling	What experiences have I had of this before? What do other resources contribute? How confident am I in the mathematics myself?
Deciding/committing	What activity/activities seem appropriate/would you like to try?
Structuring/managing	How to organise the furniture? What size of working groups, moving groups? What equipment do I need? Does it work? How? How can I engage their attention initially? Can I share the purpose of the activity with them? How many transition points? Will a time-line be a useful aid? How am I going to manage the transitions? What styles of teaching and learing will be used? How will your behaviour as teacher ensure your purpose? How to achieve differentiation? Is there a balance of activity? in teaching styles?, writing, oral aural, display, recap for the pupils? Any specific comments needed for individuals? What might go wrong?
Ending	Where is this leading? Homework? How to get them out of the classroom? Do they leave with a feeling of achievement? knowing what they have done and why?
After	How will you record what you have done? what they have done? for yourself? for them? for the insitution? What can you learn from the experience?
